SUMMARY

With a comprehensive background encompassing both Bachelor's and Master's degrees in Computer Application, I am fervently seeking a formidable position within a distinguished organization. I am eager to harness and elevate my technical, analytical, and managerial proficiencies to propel the organization's advancement. all while staying at the vanguard of cutting-edge trends across diverse industries.

EXPERIENCE

Full Stack Developer

Qspiders Traning Inistitute Chennai **July 2023 - November 2023, Chennai**

- Training: Full Stack Development Institution: Qspiders Duration: July 2023 - November 2023 (5 months)
- Technologies and Skills Acquired:
- Java: Core Java concepts, object-oriented programming, exception handling, multithreading
- SQL: Database design, querying, data manipulation, stored procedures
- HTML: Semantic markup, forms, tables, multimedia integration
- CSS: Styling, layout techniques, responsive design, CSS frameworks
- JavaScript: DOM manipulation, event handling, AJAX, ES6+ features

PROJECTS

Pathology Management System

B.S.Abdur Rahman Crescent Institute of Science & Technology · January 2023 - June 2024

- The Increasing demand for medical laboratory services and the need for efficient and accurate management of pathology tests have driven the development of automated systems, This study presents a pathology management system that uses Python.MySQL, and machine learning algorithms to streamline the process of managing pathology tests. samples and results
- Developed a pathology management system leveraging Python, MySQL, and machine learning algorithms to automate and streamline the management of pathology tests, samples, and results, achieving a 40% reduction in processing time and improving accuracy by 25%.

Cardiovascular Drug Management System

B.S.Abdur Rahman Crescent Institute of Science & Technology · August 2022 - December 2022

- The cardiovascular drug management system is intended to increase accuracy, safety, and efficiency in the pharmacy within the specific use-case of heart health management, It is a computer-based system that stores important information about the patients health conditions and predicts their probability of getting a heart disease!
